Ideas List

<https://pidgin.im/development/gsoc/ideas/> Enter the URL of your Ideas List page. This will be linked from your organization page.

Descriptions

These descriptions will be displayed on the organization list page (Short Description) and on your organization's page (Long Description). [More details](#).

The Long Description may include [limited Markdown](#).

Short Description

Pidgin allows you to connect to multiple chat networks at the same time and presents them to the user in a single unified user interface.

137 / 180

Long Description

Pidgin is a universal chat client that allows you to connect to multiple networks at once in a seamless interface. It comes with a handful of plugins for connecting to standard services but there are countless third party plugins for additional networks and all sorts of other fun. You can find a listing of them over at

349/2000

Proposals

Guidance for students on how to apply to your organization. Should include any prerequisites or requirements. You may wish to include a template or tips for their proposals. May include [limited Markdown](#).

Enter tags that students can select (one) from and apply to their own proposals to help organize them. Examples: New Feature, Optimization. You can also use these to designate "sub-organizations" if you are an umbrella organization.

Application Instructions

The application should demonstrate (by reference to previous projects, completed coursework, job experience, description, etc.) that the applicant possesses the following skills:

- * Competence in programming in the applicable language for the task at hand. For Pidgin, Finch, or libpurple themselves this means C.
- * An ability to effectively communicate, via written language, technical topics and precise thoughts.

Every application must describe the project the applicant intends to pursue. While this may contain information from our ideas page or other online sources, it must primarily consist of the applicant's own words and plans. It should include:

- * A description of the general task to be completed
- * The applicant's estimate of the skills required to complete the task, particularly noting those skills that will need to be developed during the course of the project.
- * A general timeline of the project as envisioned, with a breakdown including major milestones.

Applications need not be for projects from our ideas page. If you have a great idea for a project, that's fine, propose it! Just be sure to describe what it is, why you can do it, and how you plan to accomplish it within the summer.
